Injuries:

Division	Category	Case Date	Date Entered	Recordable	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
FE	FNAL	09/23/2014	10/06/2014	Y		0	1	0	0
Medical Comments: Employee reported to medical on 10/6/14, that while off-loading table from a truck he felt discomfort in his left shoulder. He has continued to have aching off and on since it happened.									
ESH Comments:									
AD	FNAL	10/09/2014	10/09/2014	N		0	0	0	0
Medical Comments: Employee was troubleshooting a pneumatic actuator system and the device actuated closing on the employee's finger. Sent for x-ray (negative). First aid treatment only.									
ESH Comments: The employee was performing a checkout of a pneumatic actuator for a transverse beam profile monitor in the NML/ASTA enclosure. The transverse profile monitor is one of 7 that had been installed recently, each with 2 actuators. The actuator shroud was removed while he was testing the functions of the actuator. He used his right index finger to activate the switch on a position sensor; this should have simply changed the status readback for the actuator, but instead the sensor activation unexpectedly caused the actuator to change position, resulting in the tip of his finger being caught between sensor and a metal stop on the actuator body. The employee was able to pull his finger away immediately after it was pinched. He informed his supervisor of the incident and reported to the Medical Office. After being evaluated and given first aid treatment for a contusion, he was sent off-site for x-ray examination that was negative for any fractures. He returned to work with no limitations. Immediately after the incident the air supply was disconnected from this actuator and the other newly installed actuators, and the actuators were tagged out of service until their control wiring could be investigated. Problems were found with the sensor wiring and corrected. The employee was advised to use a tool to activate similar actuator switches in the future, even if the intended function of the switch would not present a hazard, such as in this case.									
ES	FNAL	10/10/2014	10/13/2014	N		0	0	0	0
Medical Comments: While putting a screw into the SCBA trailer the employee was on his hands and knees when he stood up he hit his head a board of wood. This caused a laceration of 14 mm. Cleaned and steri-stripped.									
ESH Comments:									

Claims Pending:

None

Vehicle Accidents:

None

ORPS/Incidents/Notices of Violations:

None
